

Project Submission PAGE 1

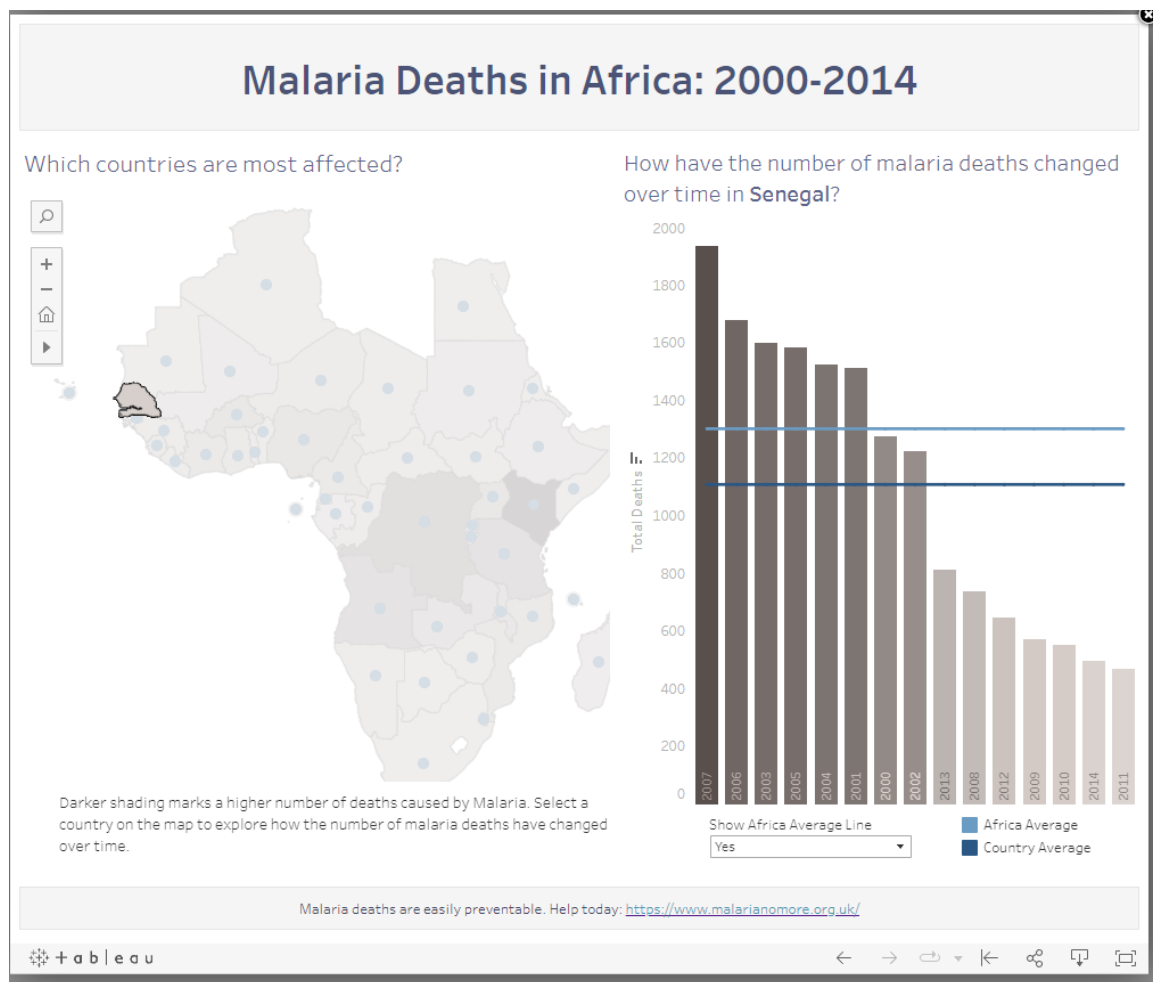

Interpret a Data Visualization

From the dashboard shows us all deaths due to malaria, starting from 2000 to 2014 In 2000, the number of deaths reached 1,275, and the number of deaths increased to 2007, which reached the largest number of deaths, with 1,935, and starting in 2008, the deaths decreased to become the number of deaths in 2014 to 500 deaths.

Project Submission PAGE 2

Interpret a Data Visualization

After ranking the dashboard, we get the highest year, which is 2007 when there were many deaths, down to the lowest year which is 2014 when there were few deaths
